Shivam Chavan

Senior AI Engineer · AI / ML & Robotics · Dubai, UAE

im.shivam.chavan@gmail.com · github.com/shivam675 · linkedin.com/in/me-be-shivam

I build across agentic AI, computer vision, and robotics. My work connects language models with useful software and intelligent machines.

Experience

Sr. AI/ML Engineer · Intelimek Systems Nov 2024 — Sep 2025

Built and deployed computer-vision systems for medical device inspection and industrial defect detection. Developed an agentic workflow harness, LLM-driven industrial software interactions, and hybrid retrieval over company research.

Sr. Robotics Software Engineer · Tata Elxsi Jul 2022 — Nov 2024

Developed robotics software for manipulation and collision avoidance, and semantic segmentation for autonomous navigation. Received the GenAI Colosseum Award for a multi-agent robotic system combining Gemini with ROS and Gazebo.

Selected projects

EasyRTG Reinforcement learning + robotics

A desktop training ground that turns a plain-language goal into reward expressions, training configurations, and learned robot behaviour.

github.com/shivam675/rl-training-ground

SLM Desk Multi-agent systems + human review

Social signal intelligence for banking: a multi-agent workflow that detects potential fraud signals, analyses risk, and prepares explainable briefings.

github.com/shivam675/gdc-mashreq-solution

FillWise Local-first document AI

A local-first document workflow for transforming PDF and Word contracts with on-device language models and an explicit human review step.

github.com/shivam675/fillWise3.0

Language to motion Embodied AI + simulation

A language-driven tabletop robotics demo that turns text commands into validated plans, then executes them in a browser-based UR5-style simulator.

github.com/shivam675/msc-project-physical-ai

Technical skills

AI & language: PyTorch, TensorFlow, LangChain, RAG, LLM agents, Ollama, MCP

Robotics & perception: ROS / ROS 2, Gazebo, OpenCV, YOLO, semantic segmentation, behaviour trees

Systems & delivery: Python, SQL, FastAPI, Flask, Django, Docker, Git, CI/CD

Education

University of Birmingham, Dubai 2025 — 2026

MSc · Artificial Intelligence & Computer Science

Vishwakarma Institute of Technology, Pune 2018 — 2022

B.Tech · Industrial Engineering

Publications

RL Implementation on Bipedal Robot · IJERT, May 2025, Vol. 14, Issue 05

3-D Printed Low-Cost Force-Torque Sensor · IJERT, May 2025, Vol. 14, Issue 05

Recognition

GenAI Colosseum Award · Tata Elxsi · Multi-agent robotic system with Gemini, ROS and Gazebo
